

Keshav Girish Adkar

(857) 313-1503 | adkarkeshav@gmail.com | LinkedIn | GitHub | Portfolio | Boston, MA

Technical Skills

Languages & Backend

Python, JavaScript, SQL, Java, C++,
Bash, Flask, FastAPI, REST APIs

AI & Machine Learning

PyTorch, TensorFlow, Scikit-learn,
Transformers, CNNs, RAG, Prompt
Engineering, LangChain, LangGraph,
LoRA/QLoRA, Claude Code, MCP,
HuggingFace

Data, Cloud & Tools

Pandas, NumPy, OpenCV, MongoDB,
PostgreSQL, Oracle DB, AWS, Git,
Docker, Linux

Experience

Deloitte India

IT Consultant (AI & Automation)

Jan 2023 – June 2025

Chennai, India

- Engineered Python-based automation workflows integrating enterprise AI logic to modernize reporting and data-processing pipelines, reducing manual effort by 30%.
- Remediated complex S/4HANA configurations to ensure compliance with enterprise data-security and access-control standards.
- Mentored junior analysts in automation scripting and engineering best practices, increasing team productivity by 25%.

HighRadius Inc.

Software Engineering Intern (Full-Stack & ML)

Jan 2022 – March 2022

Chennai, India

- Designed and deployed a full-stack B2B fintech cloud application serving 1,000+ users with Python and Flask, integrating ML inference into production user-facing dashboards.
- Built scalable data models and API integrations connecting model outputs to live workflows, improving forecasting accuracy by 25% and cutting processing time by 40%.

Aurify Systems

Deep Learning Intern (Computer Vision)

Oct 2020 – Dec 2020

Pune, India

- Built OpenCV and PyTorch vision pipelines using object detection and motion tracking across temporal camera frames to automate footfall and trend analytics.
- Engineered automated data labeling and annotation workflows, improving data efficiency by 50%.

Projects & Research

AI Agents & Tool-Calling System

LangGraph, Anthropic/OpenAI APIs, MCP Servers

Personal Project

- Built a multi-step AI agent and tool-calling system using LangGraph, the Anthropic/OpenAI APIs, and custom MCP servers, orchestrating reusable “skills” and agent hooks for automated workflows.
- Designed prompt strategies and tool integrations for reliable, multi-turn task execution across automation use cases.

LLM Hallucination & RAG Evaluation Research

Llama-3, Mistral-7B, GPT-4o-mini; TruthfulQA, HaluEval

Northeastern University

Sept 2025 – Present

- Developing RAG pipelines and evaluation harnesses to measure and reduce hallucination across multiple open- and closed-weight LLMs.
- Applying chain-of-verification, self-consistency, and citation prompting to improve grounding and response reliability, with attribution and traceability for explainable outputs.

LoRA Fine-Tuning From Scratch

PyTorch, Transformers, GPU-Accelerated

Personal Project

- Implemented Low-Rank Adaptation from first principles in PyTorch, injecting rank-decomposed adapters into transformer attention layers with hand-built layer math and optimization.
- Benchmarked GPU-accelerated LoRA against full fine-tuning, quantifying parameter-efficiency and quality trade-offs.

Education

Northeastern University — M.S. Computer Science

GPA: 3.33/4.00

Sept 2025 – May 2027

Boston, MA

- Coursework: Machine Learning, Algorithms, Database Management Systems, Programming Design Paradigm.

SRM Institute of Science and Technology — B.Tech Computer Science

GPA: 8.62/10.0

Aug 2019 – May 2023

Chennai, India

- Coursework: Data Structures, Software Engineering, Operating Systems, Computer Networking.

Achievements

- Published a character-level Bi-LSTM phishing-URL classifier in IJSER — 507K+ URLs, 99.26% accuracy.
- Certifications: DeepLearning.AI Prompt Engineering, Google Data Analytics, Oracle DB Foundations, Python Advanced.
- National-level Silver Medalist, Abacus Math Competition.
- Competitive soccer player and former junior soccer coach — teamwork, clear communication, and mentorship.
